INTERNSHIPS AND PROJECTS

Projects	SwapR (Duration April 2025 - June 2025) Developed a MERN stack web app for listing used products (sale/rent), featuring authentication, secure listings, dynamic search, responsive UI, and efficient state management. Integrated a real-time chat feature with Socket.IO for instant messaging between users, enabling smooth live communication. Through this project, I strengthened my expertise in modular API design, cloud database integration (MongoDB Atlas), secure authentication, and responsive UI with Tailwind CSS. I gained practical experience building scalable features, improving server-client interactions, and designing user-focused interfaces for real-world use.
